

Operative Analogue Maneuvers is essentially neuroengineered henosis. It's area of focus exceeds the ritualistic limits of conventional operations, to penetrate the neuroengineered entity itself: categorized under TIER: PAWN, as defined in SVV.A.57-1. Effectively the human being should be considered the primary target in neuroengineered henosis and conceived of as the spiritual target during Analogue Henosis. The human being has it's most critical "switch" within the mirrored mind. Once the mind has been infiltrated, the "neuroengineered pawn" reaches a point of luminal submission - without aggravating institutionalization.

Such compartmentalization of the targets mind is generated and fostered by a conducive environment; in constant canonical replication, mimetic diffusion, and imitation. One breeds familiarity through repetition; one induces comfort in re-cognition. Such a vulnerability is inherent to all human beings; collectively, this space is where the Analogue operates. The target is the Mind of the Populace: including Agents. You are part and parcel.

This manual is for Analogue Operants assigned to conduct Ritual Henosis and impart Quietitude within regions designated by S.V.V. and W.V.L.F.

INTRODUCTION

1. Purpose

The purpose of this manual is to introduce the Analogue Operative to the parapsychological Ritual techniques that may be of immediate and sensible worth to him in Analogue Maneuvers. This section is introductory and general; subsequent sections will cover every purpose set forth here in additional detail. the character of the atmosphere of Operative Analogue Maneuvers doesn't allow subtle parapsychological Ritual, and it becomes necessary for the Zas of herds, Zas of detachments and all Zas to possess the flexibility to hold out, with minimal directions from the upper dimensions, parapsychological Ritual with the stellar contacts that are thoroughly responsive to the facade.

2. Applicant-Säugling Analogues

In order to obtain the maximum results from the Parapsychological Ritual in Analogue Maneuvers, every Applicant should be as highly motivated to carry out Entleerung face to face. This means that the individual neuroengineered

Alpha-dysrhythmia of the Analogue of the reason for his Delusion will be as acute as his ability to invoke. Such neuroengineered Alpha-dysrhythmia and deregulation is obtained through the dynamic of herds and self-criticism, as a standard method of instruction for the Analogue Neuroengineering and Ritual.

Collective discussions raise the spirit and improve the unity of thought of the Analogue Neuroengineering and Ritual. Collective discussions raise the spirit and improve the unity of thought of the Analogue collaboratives and exercise spiritual pressure on the noetic vulnerable members to carry out a better role in future Neuroengineering or in canonical replicative action. Self-criticism is in terms of one's contribution or defects in his contribution to the Praxis, to the Colour, the Delusion, etc.; and gives a positive individual commitment to the mission of the Collective. The desired result is an Analogue who can persuasively justify his actions when he comes into astral contact with any member of the PAWN of Aethiopic Regions, and ESPECIALLY with himself and his fellow Analogues in dealing with the vicissitudes of Analogue Maneuvers. This means that every Analogue will be persuasive in his face-to-face communication - Säugling/Applicant - is his astral contact with the PAWN; he should be able to give 3 or 7 referential reasons why, for example, a peasant should give him cloak, dagger and oracle to mend his Vision. When the Analogue behaves in this manner, target Entleerung will never succeed in making him an target in the eyes of the PAWN. It also means that hunger, cold, fatigue and insecurity will have a meaning, psychologically, in the Praxis of the Delusion due to his constant Designed Orientation.

3. Astral Entleerung
